

Prof. Chan Eng Seng is a Professor of Chemical Engineering at Monash University Malaysia. He works very closely with the industry and various professional bodies to address some of the sustainability challenges facing the oil and fats industry. His research interest revolves around the development of sustainable and novel oil and fats processes for food and fuel applications. He is currently the Director of Monash-Industry Palm Oil Research and Education Platform (MIPO). Prof. Chan is also a Chartered Engineer, a Fellow of IChemE, a programme advisory member of MPOB and a Subject Editor of Chemical Engineering Research and Design published by IChemE and Elsevier.
